

Hi Autism Action South Africa! Thanks to those of you who participated in our webinar last week. For those who did not (I understand there was some bad weather that day), I still wanted to invite you to learn more.

rethink autism's innovative web-based autism treatment platform is currently being used by school districts, agencies, universities and parents around the world! Our system offers a comprehensive Applied Behavior Analysis (ABA) curriculum with 1200+ video-based teaching steps showing you how to teach each lesson, an assessment tool that helps individualize the program for each child, parent and staff training modules, and progress tracking features. It is geared towards children with autism from point of diagnosis through early adolescence, covers a broad range of skills (e.g., academics, language, social, motor, daily living, behavior management), and spans the entire autism spectrum. Leaders in the field of autism treatment, education and research serve on our [Scientific Advisory Board](#).

Please consider the following options to learn more:

1. Sign up for a [FREE ONE-WEEK TRIAL](#) to "test drive" our system;
2. Check out a pre-recorded [FREE WEBINAR](#) to introduce you to all of the features & benefits in less than 20 minutes;
3. Contact me directly to discuss your needs: jamie@rethinkautism.com or 646.705.5789

I look forward to being in touch!

PS – I also encourage you to check out a news segment on our Company that recently aired on ABC World News with Charles Gibson (click link below). I hope you find the piece informative and that you will share it with others who may be interested!
